

IP Academy

Incremental Progression Pickleball Academy

Academy League Play

Academy League Play is designed to test your overall performance through game base matches. Lessons and clinics can be tested with playing matches in a control environment to achieve incremental progression. The constant balance between power and control will be tested with each situation point.

Power

Control

Academy League Play – Mission: provide a match game situation for our academy players to achieve incremental progression by competing in a control environment. The schedule match-up partners provides opportunities to play partnership doubles and avoid singular doubles. Arranged double partners can promote their defined strategies, communication skills and playbook practice to enhance your total game.
